

General information

- Site Guide **Navigation & Pager App**: The standard solution for navigation on private and company sites. Navigation for visitors, truck drivers but also employees.
- Site Guide **Employee App**: "Digital site map for your pocket" with the main functions Information, Orientation and Navigation.
- Site Guide **Construction Zone Management**: Administration and representation of construction works on the site.
- **Interactive site map**: Displays the site map including all contents (tags, construction zones, etc.) in the browser. For integration into the intranet, at the reception, at the site fire brigade, at the site security, etc.

All solutions go hand in hand and can be used together, but also individually. Depending on the selection of functions, the Site Guide covers various use cases for different departments. Of course, we will advise you with tips from practice. If you are interested, a pilot project can be carried out to evaluate the use on your site.

In use at

Site Guide solutions are already being used by a wide range of companies in the industry sector. These include Henkel in Düsseldorf, LyondellBasell in Wesseling, Chemiepark Knapsack in Hürth, ArcelorMittal in Eisenhüttenstadt, the Duisburg Intermodal Terminal and the Dillinger Hütte in Dillingen/Saar.

Advantages for your company

By using one or more Site Guide solutions, a variety of benefits can be achieved for different areas:

From the perspective of site security and logistics

- Increased safety through targeted guidance of traffic and pedestrians
- Convenient access to security related information (such as construction zones)
- Direct communication with the truck drivers via the pager function.
- Conservation and digitization of employee know-how, for example navigation guidelines for truck drivers (e. g. in case of illness or change of personnel)
- Fast ability to react (e. g. in case of accidents)
- Avoid delays in delivery caused by losing the way
- Overcoming language barriers with multinational visitors / truck drivers
- Use of a guidance system already proven on many sites

From the perspective of employees at the site in general

- Quick and easy on-site orientation, less delays to meetings and less people getting lost on the way
- The "Digital site map for the pocket" provides quick and easy access to all relevant site information
- The push functionality enables targeted reception of relevant information
- Valuable orientation aid for new employees

From the perspective of construction department and facility management

- Simple and central overview of all construction projects and other special zones on the site, thus less time spent on information gathering
- Time savings through easier communication of construction zones via the app and / or the map on the intranet

From a global corporate perspective

- Contemporary modern corporate image inside (employees) and outside (visitors/customers/business partners)
- Increase of employee satisfaction and efficiency
- Increased traffic safety for all groups of people (employees, visitors and suppliers) on the site
